ELECTRIC WAVES SWEEP WORLD.

Mysterious Pulutions of Em
Energy Roll Down from
the North Pole.

TIE UP THE TELEGRAPH.

"Wireless" System Hopeful and
the Others Work Heavily
If at All.

Two amazing electrical discoveries, one
portent of the energy that moves the
world, one useful in its practical
aspects, are made public this week.

In one case, Chicago is the
capital of the wireless and
in the other, New York.

In Chicago, scientists of
the University of
Chicago have announced
the latest progress
in wireless
research that
is finding
practical
applica-
tions.

In New York, a
series
of
\new\wireless\ devices
are being
played
by
inventors
who
are
not
