AURORA BOREALIS HALTS WIRELESS TO GERMANY.

[BY A. P. NIGHT WIRE.]

NEW YORK, May 24.—Wireless communication between the United States and Germany has been severely handicapped and probably will continue so until about July 1 by the static conditions prevailing in the North Atlantic at this time of the year.

The electrical activities of the aurora borealis, accompanied by

electrical storms over the wireless routes, are the cause of the difficulty. It is explained, and may be expected to continue several weeks. This means that until normal conditions again prevail uncensored communication between Germany and the outside world will be limited.

The news agencies meantime have been obliged to depend upon London for regular transmission of the daily German War Office statement.
